Introduction

What motivated you to study this method? Why are you interested? Focus on the reason this technique was developed.

Background

What kinds of statistical problems is it good for analyzing? Review and discuss at least three statistical papers that define the technique, i.e. literature review.

Methodology

Brief description of the data How is it being collected? What variables are being measured and analyzed? Is there anything special about the data such as autocorrelation? Brief description of the technique including statistical model Illustrate the technique using your data

Results

Summary and interpretation of your analysis SAS or R code or SPSS syntax (or any other software you use) may be placed in the Appendix. Use Courier font to present SAS or R or SPSS syntax results to maintain its formatting. ## Discussion and Summary What do you think of the technique? Is it a useful methodology? Relate your results to other closely related techniques currently being used Discuss potential issues and further researc ## References
